- SELF-LATCHING
- NO USER INPUT REQUIRED TO SECURE
- EASY ENTRY / EXIT FOR ADULTS
- MOUNTED OUT OF REACH OF CHILDREN
- EASY TO INSTALL
- AGES 1-5

How it works

Watchdog Latch is a self-latching device that grabs the edge of any type of hinged door. The device is mounted out of reach making it difficult for a child to operate, but, at the same time easy for an adult to push aside when entering or exiting a room. The spring-steel shaft is very strong and has a natural curve that matches the door's swing for proper contact.

Hooks Come in a Variety of Colors

Blue
